

# Thursday 5th of June

## Landscapes, Management & Monitoring

07:00 - 08:00	Breakfast
08:30 - 09:00	Paolo Ciucci - Not only population abundance: reflections on the quality of wolf conservation
09:00 - 09:30	Valeria Salvatori - TBA
09:30 - 10:00	Glenn Lelieveld - TBA
10:00 - 10:30	Hugh Jansman - Of wolves and men: The bold and the beautiful
10:30 - 11:00	Break
11:00 - 12:20	Panel Discussion - TBA
12:20 - 13:20	Lunch

### 13:20 - 15:00 Parallel Presentations & Sessions

Themes	Population management	Preventative measures	Wolves in cultural landscapes	Genetics and feeding ecology	Sessions: Governance
13:20 - 13:40	<b>Joachim Mergeay</b> The effective size of European wolf populations and its implications for policy and management.	<b>Barbara Zimmermann</b> Carnivore exclosures to protect sheep in the boreal forest affect the area use of moose.	<b>Catherine Frizat</b> FERUS' Pastoraloup program: supporting appeased wolf coexistence.	<b>Gregor Simčič</b> Visualisation an exploration of complex multi-generational pedigrees.	<b>TBA</b>
13:40 - 14:00	<b>Cyril Milleret</b> Wolf population size estimation.	<b>Annika Held</b> Effectiveness of strobe light as a potential deterrent stimulus for wolves.	<b>Erik Versluijs</b> Living with wolves: A new framework to enhance coexistence with wolves by studying livestock behaviours.	<b>Lilian Heinzl</b> Does Genetic Admixture Affect Ghost Wolf Ecology?	<b>TBA</b>
14:00 - 14:20	<b>Florian Kunz</b> Using a stage-based life cycle implementation to model population viability of European wolves.	<b>Chris Smit</b> Free-ranging cattle and the return of the wolf; implications for conservation management.	<b>Katharina Kasper</b> Of wolves navigating a human landscape of fear.	<b>Jack W. Rabe</b> Prey size mediates interference competition and predation dynamics in a large carnivore community.	<b>TBA</b>
14:20 - 14:40	<b>Kathleen Petersen</b> Wolves on the Move: Investigating Dispersal and Human-Caused Mortality in a Social Carnivore.	<b>Ray Nickerson</b> Evaluating the Effectiveness of Range Riders at Reducing Wolf-Livestock Conflict Across the American West.	<b>Uri Arad</b> The effect of diseases on the depredation of calves by wolves.	<b>Katarzyna Bojarska</b> Short-term responses of red deer to wolf presence are related to predation risk.	<b>TBA</b>

Themes	Population management	Preventative measures	Wolves in cultural landscapes	Genetics and feeding ecology	Sessions: Governance
--------	-----------------------	-----------------------	-------------------------------	------------------------------	----------------------

14:40 - 15:00	<b>Nina Gerber</b> Evaluating the effect of lethal management in Switzerland.	<b>Philippine Surer</b> Evaluating the non-lethal effects of wolves on cattle herds in the Swiss Jura mountains.	<b>Hadrien Raggenbas</b> Anticipating wolf comeback to Western France.	<b>Florin Kunz</b> Unveiling the Feeding Patterns & Preferences of Wolves in Switzerland	<b>TBA</b>
---------------	--	---	---	---	------------

15:00 - 15:30	Break
---------------	-------

15:30 - 17:30	Parallel Workshops						
---------------	--------------------	--	--	--	--	--	--

<b>Hans van Eijden &amp; Tim van Dam (Smart Parks)</b> TBA	<b>Wildlife Acoustics</b> Turning Sound into Discovery - Using Sound to Study Wolves	<b>Theodoros Kominos</b> The use of UAV (Unmanned Aerial Vehicle) and handheld thermal cameras in research.	<b>Josip Kusak</b> The craft and art of trapping wolves.	<b>Aldin Selimovic</b> Trapping and collaring wolves under different conditions across Europe.	<b>Valeria Salvatori</b> How to manage close encounters with wolves in human dominated landscapes.	<b>Erik den Boer</b> How to vlog while doing research.	<b>Aimee Talian</b> Future of Wolves Across Borders.
---	---	--	---	---	---	---	---

17:30 - 18:00	Closing Ceremony
---------------	------------------

18:00 - TBA	Evening Social
-------------	----------------

WOLVES ACROSS BORDERS
